

WebSite X5 v14

80 NEW FEATURES & IMPROVEMENTS

Graphic

Fonts

1. **Font Management:** fonts are now linked to the project's Graphic Template, and not to the software, so moving projects from one PC to another is seamless.
2. **Default font:** set the template's default font and update all your texts in a click.
3. **Integrated Google Fonts and Web Fonts:** use the Other font types command to add fonts to the template while you're working.
4. **Automatic search and download** of Google Fonts directly from the Google server.
5. **Web-Safe Fonts:** the Font list only includes fonts that are suitable for web display.
6. **Professional Edition:** in Step 5, the Project Analysis tells you if a font isn't linked to the project.

Templates

7. 200 new Graphic Templates included in the software.

ShowBox

8. A new layout and style for the ShowBox.
9. A new icon style library for the ShowBox.
10. **Multi-level image zoom:** blow up details in pictures.
11. **Full-screen galleries:** the ShowBox can be displayed at full-screen, wherever it is used.
12. **Transition effect** for passing from one image to the next is uniform throughout the website.
13. **Thumbnail navigation:** use thumbnails to browse through pictures in galleries.
14. **Image numbering:** use the *Show Progress Indicator* option to show the number of the current image and total number of images.
15. **Website Page:** display a website page directly inside the ShowBox.
16. **Videos in a ShowBox:** you can start videos in the ShowBox with the ShowBox Gallery link

Parallax and Row Style

- 17. New reverse Parallax Effect.
- 18. New fixed Parallax Effect.
